Quality For You

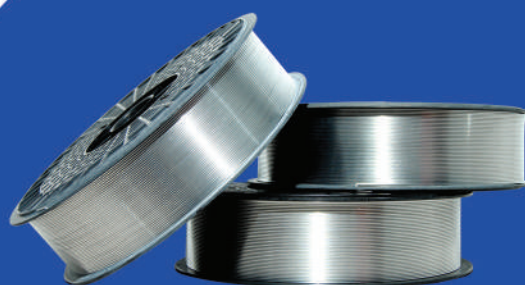

Our aluminum wires are mainly used to vacuum metalize plastic films and paper products. Other product applications are also available upon customers special request.

Our quality control ensures purity, fine temper, accurate wire diameter, lubricant free, and smoothbright surface of aluminium wires. We wrap individual Spool and Coil with plastic shrink and pack them in carton box to avoid corrosion.

**"Reliable and consistent  
Aluminium Wire with  
excellent after sales  
service"**

**Our products, your needs.**
